# SCOPE OF

## “HEALTH & WELLNESS INDUSTRY”

So far the quality service was limited to 5 star hotels and handful of branded Treatment Centers. This was because the clientele was mainly high net worth people. after the present revolution of look good - feel good factor the demand is multiplied many fold. Unfortunately these are no quality standard and clinics and treatment centers are mushrooming with unhygienic standards and run by persons with no formal certification / education. There is a growing demand at the rate of 20% - 40% for quality education and services in this industry. TKC (The Knowledge Company) study reveals that there are 1.6 million households in India alone with disposable income of more than rupees 4,00,000 per annum to be spent on fashion, lifestyle, services for self and family members. It is because of this that the Cosmetology, Trichology & Slimming Centers as well as every doctor be it BHMS, BAMS, BDS, MDS, MBBS, BUMS, BPT all are in great hurry to enter the market. However, as on today the industry is starved of well trained & certified staff.
